- Information...In a Larger Than Life 84" Digital Image
- High Powered Low Cost Retail Digital Signage
- Create a Bold Corporate or Retail Image
- Mounts in Overhead Space for Tight Retail Applications
- Low Maintenance, No Burn-in with DLP™ Technology
- Plug and Play Solution

**InfoWall DS-84** is the first of its kind in a new class of display device, the **Lightweight Indoor Rear Projection Digital Sign**. It features an 84" diagonal (16:9 HDTV Format ) Rear Projection display screen, designed around the amazing **NEC WT600 DLP™ Projector**.

This innovative enclosure is designed to maximize rare and costly retail space and can be mounted on a wall or suspended from the ceiling. The sleek design of the outer shell is constructed of lightweight aluminum alloy to minimize weight and provide a modern eye-catching display. The enclosure's shell can be finished in the color or texture of your choice, and can feature your company's logo or insignia on the side marquee panel.

We employ the latest screen technology to optimize the image uniformity and brightness, while offering the best weight saving advantages possible. The low maintenance DLP™ projector offers significant advantages over smaller plasma displays and will prove to be the best choice for many applications.
